240v AC system Inc charger. (Standard EU Models)

Construction

At Albin we use the best available materials for the construction of our ocean-going vessels.
Deck Hardware is through-bolted using aluminium -backing plates.

Hull-to-deck joint is through-bolted and chemically bonded and sealed using "5200" adhesive.
We construct our boats using a combination of bi-axial & uni-directional FRP knitted products.
All through-hull areas have solid reinforcement to prevent damage to the Hull/Deck Laminates.

By the use of these construction techniques, coupled with superior hull and interior designs, we enjoy the enviable reputation of fine sea-keeping qualities, comfortable and practical interiors with economy in use.
